Manual Testing Report

Manual testing was performed on the **SupportDesk – Helpdesk and Support Ticket Management System** to verify its functionality, usability, and adherence to the specified requirements.

The test cases and their corresponding results are presented in tabular format in the following section. Screenshots of the application during test execution are provided at the end of this report as supporting evidence of the testing activities.

Test Object	Input	Actual Output	Expected Output	Remark
Valid Admin Login	Username: admin Password: Admin@12345	Admin successfully logged in and Admin Dashboard was displayed	System should allow the Admin to log in successfully and display the Admin Dashboard	Pass
Valid Agent Login	Username: agent1 Password: Agent@12345	Agent successfully logged in and Agent Dashboard was displayed	System should allow the Support Agent to log in successfully and display the Agent Dashboard	Pass
Valid Customer Login	Username: customer1 Password: Customer@12345	Customer successfully logged in and Customer Dashboard was displayed with Customer One and CUSTOMER role	System should allow the Customer to log in successfully and display the Customer Dashboard	Pass
Invalid Login Credentials	Username: customer1 Password: WrongPassword@123	System rejected the invalid credentials and displayed an error message	System should reject invalid credentials and display an appropriate login error message	Pass
User Logout	Logged-in Customer clicks Sign out	User was logged out successfully and redirected to the SupportDesk login page	System should successfully log out the user and redirect the user to the login page	Pass
Unauthenticated Access to Protected Page	Logged-out user manually accessed /tickets/	System prevented access and redirected the user to the SupportDesk login page	System should prevent an unauthenticated user from accessing the protected ticket page and redirect	Pass

Name: Atharva Santosh Kanekar

			the user to the login page	
Valid Ticket Creation	Subject: Unable to connect to office Wi-Fi; Priority: HIGH; Valid description entered by Customer One	Ticket TKT-20261008-3B76 was created successfully with HIGH priority and OPEN status and displayed under Customer One's tickets	System should successfully create the ticket with the entered details, generate a ticket number, and set the initial status to OPEN	Pass
Ticket Creation Without Priority	Subject: Unable to access company email; Priority: Not selected; Valid description entered	System prevented form submission and displayed the browser validation message “Please select an item in the list.” No ticket was created	System should reject ticket creation when Priority is not selected and prevent creation of a ticket without a priority	Pass
Ticket Creation Without Subject	Subject: Blank; Priority: Medium; Valid description entered	System prevented form submission and displayed the validation message “Please fill out this field.” No ticket was created	System should prevent ticket creation when Subject is not provided	Pass
Customer Views Own Tickets	Logged-in user: customer1; Opened My Tickets	System displayed the My Support Tickets page with 3 tickets, including ticket TKT-20261008-3B76 belonging to Customer One	System should display the tickets belonging to the logged-in customer	Pass
Search Ticket by Ticket Number	Search: TKT-20261008-3B76	System filtered the ticket list and displayed only ticket TKT-20261008-3B76 with subject Unable to connect to office Wi-Fi	System should display the matching ticket and filter out unrelated tickets	Pass
Filter Tickets by Priority	Priority = High	2 HIGH-priority tickets displayed; MEDIUM ticket excluded	Only HIGH-priority tickets should be displayed	Pass

Name: Atharva Santosh Kanekar

Combined Search + Status Filter	Search = VPN, Status = Closed	1 matching CLOSED VPN ticket displayed	Only the ticket matching both conditions should be displayed	Pass
Reset Filters	Click Reset after applying filters	All filters cleared and all 3 tickets displayed	Filters should reset and full ticket list should return	Pass
View Ticket Details	Open an existing ticket from the ticket list.	Ticket details, status, priority, customer and assignment information were displayed.	System should display the selected ticket details to an authorized user.	Pass
Search Ticket by Ticket Number	Enter an existing ticket number in the search field.	The ticket list was searched using the ticket number, and the matching ticket was displayed.	System should display the ticket matching the entered ticket number.	Pass
Filter Tickets by Status	Select a status such as Open or In Progress.	The selected status filter was applied, and the ticket list displayed matching tickets.	System should display tickets matching the selected status.	Pass
Filter Tickets by Priority	Select a priority such as High.	The selected priority filter was applied, and tickets matching the selected priority were displayed.	System should display tickets matching the selected priority.	Pass
Assign Ticket to Agent	As admin, select Support Agent 1 and click Assign Ticket.	A success message confirmed that the ticket was assigned to Support Agent 1, and its status changed to Assigned.	to Support Agent 1 and its status changed to Assigned. System should assign the ticket to the selected agent and update its status to Assigned.	Pass
Reassign Ticket to Another Agent	As admin, select Support Agent 2 and click Reassign Ticket.	The ticket was reassigned to Support Agent 2, and the updated assignment was displayed on the ticket details page.	System should update the assigned agent and record the reassignment.	Pass
Agent Views Assigned Ticket	Log in as the assigned agent and open the assigned ticket.	The agent interface was accessed, and the ticket-	System should allow the assigned agent to view the ticket.	Pass

		management interface was displayed.		
Agent Cannot Update Another Agent's Ticket	Log in as Agent 1 and attempt to access a ticket assigned to Agent 2.	Access to a ticket assigned to another agent was restricted, preventing unauthorized modification.	System should prevent an agent from modifying another agent's ticket.	Pass
Customer Views Own Ticket	Log in as Customer 1 and open a ticket created by Customer 1.	The customer interface displayed the customer's ticket-management options.	System should allow the customer to view their own ticket.	Pass
Customer Cannot View Another Customer's Ticket	Log in as Customer 1 and attempt to open a ticket belonging to Customer 2.	The system prevented the customer from accessing a ticket belonging to another customer.	System should prevent access to another customer's ticket.	Pass
Post Comment on Ticket	Enter a comment in Conversation & Notes and click Post Comment.	The message "Comment posted successfully" appeared, and the comment was displayed in Conversation & Notes with the author and timestamp.	System should save and display the comment with its author and timestamp.	Pass
Submit Empty Comment	Leave the comment field blank and click Post Comment.	The system rejected the empty comment and displayed a validation message instead of saving it.	System should reject an empty comment and display a validation message.	Pass
Upload Valid Attachment	Select a supported image file smaller than 10 MB and click Upload File.	The message "Attachment uploaded successfully" appeared, and the uploaded image filename and file size were displayed in the Attachments section.	System should accept supported files within the 10 MB limit.	Pass
Upload Without Selecting a File	Click Upload File without selecting a file.	The system displayed the error "The	System should reject an empty upload and	Pass

		submitted file is empty."	display an appropriate validation message.	
Upload Unsupported File Type	Select an unsupported file such as Demo.exe and click Upload File	The upload attempt with Demo.exe was rejected or did not complete successfully.	System should reject unsupported file types and display a validation message.	Pass
Upload File Exceeding 10 MB	Select a file larger than 10 MB and click Upload File.	The system displayed the error "File size must not exceed 10 MB."	System should reject files larger than 10 MB.	Pass
View Uploaded Attachment	Open a ticket containing an uploaded attachment.	The uploaded image appeared in the attachment list with its filename and file size.	System should display the uploaded attachment and its file information.	Pass
Change Status to Assigned	As admin, select Assigned for an Open ticket and click Advance Status.	The system displayed a success message confirming the status change to Assigned.	System should allow the valid Open-to-Assigned transition.	Pass
Change Status to In Progress	Select In Progress for a ticket in Assigned status and submit.	The system displayed "Status updated to 'In Progress'." The ticket status badge changed to In Progress.	System should allow the valid Assigned-to-In Progress transition.	Pass
Change Status to Resolved	Select Resolved for a ticket in In Progress status and submit.	The system displayed "Status updated to 'Resolved'." The ticket status badge changed to Resolved.	System should allow the valid In Progress-to-Resolved transition.	Pass
Change Status to Closed	Select Closed for a ticket in Resolved status and submit.	The system displayed "Status updated to 'Closed'." The ticket was marked Closed, and the workflow controls were replaced with a terminal-state message.	System should allow the Resolved-to-Closed transition and treat Closed as terminal.	Pass

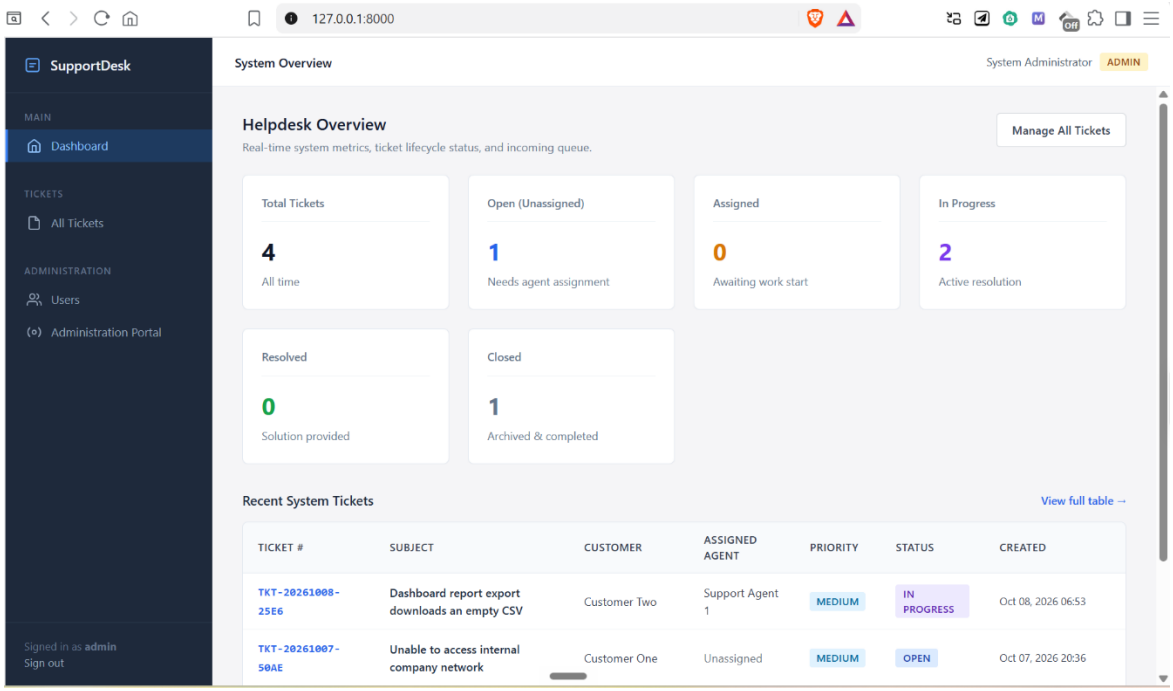

Name: Atharva Santosh Kanekar

Modify a Closed Ticket	Open a Closed ticket and inspect the workflow controls	The page displayed “This ticket is Closed (terminal state),” and the workflow transition controls were no longer available.	System should prevent further status transitions from Closed.	Pass
Verify Ticket Audit Trail	Open a ticket after assignment, comments, attachment upload or status changes.	The audit trail displayed status transitions and ticket activity with the responsible user and timestamp.	System should record ticket activities and display the audit history.	Pass
Direct URL Permission Check	Log in as a customer or agent and directly open an admin-only URL or another customer's ticket URL.	Unauthorized direct access was denied, preventing the user from accessing restricted ticket or administrative information.	System should enforce role-based permissions for direct URL requests.	Pass
Invalid Workflow Transition	Attempt to skip a workflow stage or move a Closed ticket to an earlier status.	The system rejected an invalid status transition and maintained the permitted ticket workflow.	System should reject invalid status transitions and preserve the defined workflow.	Pass
